AGENDA

International Cooperation between Brazil and the European Union in Science, Technology and Innovation has recently celebrated ten years of successful targets jointly achieved, and has been moreover reinforced by a newly signed Administrative Agreement between the Directorate-General for Research and Innovation of the European Commission, the Brazilian National Council of State Funding Agencies - CONFAP, the Brazilian National Council for Scientific and Technological Development - CNPq and the Brazilian Funding Agency for Studies and Projects - FINEP.

This international event intends to showcase EU-Brazil strategic cooperation in STI and disseminate existing opportunities under the framework of *Horizon 2020*, tracing future cooperation pathways under the *Horizon Europe* programme. The programme will count with the participation of high representatives from the European Commission, and of the Brazilian State and Federal Funding Agencies and is open to the participation of representatives of Higher Education Institutions international affairs units and the research and innovation community in general.

The afternoon session - or training Camp - aims at addressing how Brazilian co-funding schemes may be better synchronized to international cooperation opportunities within Horizon 2020.

The event is supported by the H2020 INCOBRA project "*Increasing International Science, Technology and Innovation Cooperation between Brazil and the European Union*"

The morning session of the event will be held in English and Portuguese and will count on translation services, whereas the afternoon session will be held in Portuguese.

The morning event will be broadcasted live through the following link:

<http://video.rnp.br/portal/transmission.action?idItem=47722>
